

**December 1, 2023:**

Memo to Science Center departments regarding the [Final Electrical Project Shutdown](#) on December 27, 2023.

Work will be performed at the Littauer parking lot that may have a slight impact on Science Center departments. This work has been planned in an effort to develop a schedule with the least impact on teaching and learning. This work may or may not impact your schedule in the Science Center and surrounding buildings.

**Scope:**

The scope of work for the Littauer lot is a below grade investigation that requires borings. Please see [attachment](#) for details concerning this work.

**Timing:**

This below grade investigation will take place 12/21 – 12/22 and 12/26-12/28 from 7am – 3:30pm.

**Impact:**

With the borings, there will be intermittent noise on these dates. It is not 100% clear if it will be loud enough to disturb your departments, but we don't want to catch you off-guard; and as you can see, it was scheduled to avoid any impact on exams.
