

June 1, 2023:

Restrooms Renovation Project

As we are now beginning a long road of Science Center Building improvements we will need to provide all departments with weekly updates. These updates will include location of planned work and what to expect for traffic changes and noise expectations. The first project will be the restroom renovations. The first phase will begin today, Thursday, June 1, 2023, and will require the closing of the 1st floor (Suite 142), 2nd, 4th, 6th, and 8th floor restrooms. All other restrooms will remain in operation. Some adjacent offices will be greatly impacted on the 2nd and 6th floors. These offices will need to relocate during construction. If you need any assistance with relocation please, feel free to reach out to our office.

I have attached a set of plans--[maab phase 1a-temp logistic plan 6-1-23.pdf](#)--that show the temporary partitions that will be constructed at each restroom and the duration that they will remain in place. Please feel free to reach out to our office with any questions or concerns.

Thank you,

Mark J. Pimentel
